Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 1-22 and 26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/18/05.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 23 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Gennaro (Remington: The Science and Practice of Pharmacy).

Gennaro teaches processes for the production of tablets. The process of wet granulation comprises mixing the tablet ingredients in a high shear mixer followed by drying in a flat bed oven, such as a fluidized bed oven (pages 1623-1624). No difference is seen between the process of Gennaro and that of the instantly claimed invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 1754

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gennaro as applied above and further in view of Chau et al. (US 5,637,313).

Gennaro does not specifically teach the use of calcium carbonate as an ingredient in the production of tablets. Chau et al., however, teaches that calcium carbonate is often included in a variety of tablets as antacids and bulking agents. It would have been obvious to one of ordinary skill at the time of invention to include calcium carbonate in a tablet (such as a vitamin or an antacid) produced by the process of Gennaro, as the use of calcium carbonate is a variety of medicines, vitamins, and supplements is known in the art.

Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gennaro as applied above and further in view of Iorio (US 4,812,303).

Gennaro does not specifically teach the use of calcium carbonate as an ingredient in the production of tablets. Iorio, however, teaches that calcium carbonate is used as an ingredient in the production of calcium supplement tablets. The tablets are made by conventional processes, such as those taught by Gennaro. It would have been obvious to one of ordinary skill at the time of invention to use the conventional tableting processes of Gennaro to make the calcium supplements of Iorio.
